THIS IS N-FORCE

Small world — wouldn't like to paint it — or so the saying goes down our house (in the middle of our street)

But it's true you know, the global village is getting that teeny bit smaller every month. Take the recent release of *StarWing* for instance — it can be yours for the altogether reasonable (Nintendo would probably claim giveaway) price of "just" £39.99.

Compare and contrast this with the £110.00 some importers would have you pay for a Japanese copy of *StarFox*. Global releasing clearly isn't good news for everyone! But there you have it — It's a funny old world!

 2 UPDATE!

The N-FORCE NEWS NETWORK is buzzin' with pages of the latest news and previews. This month heralds a real breakthrough in multi-player gaming technology for the SNES, meanwhile a quick glance at our previews section confirms that it's a mad May even for normal games! Come in New York and Tokyo — this is... err... Ludlow calling...

Tap Dancing!

One player games are okay, two player ones are better — but isn't five the nearest you can get to a SNES rave?

Ding ding! In the red corner we have a guy in red trunks and in the blue corner we have some dude in blue. Who's the bald git though?

Late last year, Nintendo announced details of a SNES multi-player system allowing up to five controllers for specially designed games. Several companies quickly recognized the potential of this system and introduced various units.

multi-tap with two controllers at the front and room for two others — one at each side. Both adaptors hook up at either controller port, the fifth player plugs into the spare port.

But before you rush off to buy a multi-tap remember you have to have specially

designed games and at the moment there aren't that many — even in Japan. There are two *Monopoly*-type games but they only share the two regular controllers so there's no real need for the tap. There are also a couple of quiz games, but these are written entirely in Japanese so they're no use to UK game fiends. So what's left? Just one right now — Human's *Super Fire Pro-Wrestling 2* (see review next issue) for up to four players.

SFPW2 is extremely popular in Japan — all shops have been sold out since December — and if you're a big pro-wrestling fan the game might be just what you're looking for. There are over 24 wrestlers to choose from with masses of special moves and no real rules — so if you

Exhaust Heat 2

SFC

Producer: Seta
Available: Now
Status: Import

The best of last year's F1 racing sims is back sporting Seta's new super custom co-processor chip. If you thought Mode 7 was fast — this will blow you away!

Don't hang around on the starting grid! The rest of the field have tremendous acceleration — unfortunately, your basic car is about as fast as a concrete snail!

There's one big difference between *Exhaust Heat 2* and other racing games — speed! That shouldn't come as a big surprise as the new co-processor chip cranks up the SNES data-

processing speed by up to twenty times.

In this hard-core Grand Prix sim you're up against 25 opponents in every race, each with different cars — for example, some have powerful engines providing excellent acceleration and speed but dreadful handling. As the chip enables the SNES to keep track of all your opponents, you're guaranteed true-to-life strategic race action.

To earn the honour of competing against the elite F1 drivers, you have to work your way through the ranks from Group C and F3000 racing. Finishing sixth or higher earns prize money for upgrading your car with better engines, brakes, aerodynamic parts and suspension.

Qualify on all the courses in a class and you move up to the next category. After clearing F3000, you finally get to do battle with the '92 F1 aces including Mansell,

These cars are from the relatively easy — but still blimmin' fast — Group C class. Master these super-charged sports cars then move onto F3000 and Formula One.

Senna and Alesi.

For your F1 debut, you join either Benetton, Footwork or Venturi. By piling up wins and improving your car, you can progressively move to better teams — it's possible to be teamed with Nigel Mansell at Williams, but only if you've got what it takes!

At the F1 level there are sixteen courses, all replicas of the actual tracks used in the '92 season. There are sixteen other courses, eight each in Group C and F3000. Given the number of tracks and the amount of mechanical improvements you can put your machines through, the road to F1 glory should prove to be a daunting challenge. Are you up to it?

Norton Kai

Put the pedal to the metal and don't stop till you reach the checkered finish line. Use the map of the track on the left to find the fastest route round the circuit.

Take as many practice laps as you need to set the fastest qualifying lap. The faster your time the higher your position on the starting grid.

fight dirty this is right up your street!

Sounds pretty good, huh? But as you know the SNES can slow down when there's too much action on screen. And when it's calculating data for four separate players, each with their own special moves — even with graphics and sound effects this crude — the slow down is horrible — *Street Fighter II* this isn't!

Don't despair, there are a couple games in the works that could make a multi-tap a worthwhile investment: Hudson is working on *Super Bomberman* — a re-working of the NES classic *Dynablast* — to make it a five-player blastathon; and Human is tweaking their excellent *Super Formation Soccer* for four-player mode — I can't wait for that one!

Terminator 2

In *Terminator 2: Judgment Day*, Arnie plays the good guy doing battle against the evil forces of SKYNET who are intent on destroying all human life. The rebels have been fighting for their lives for over three decades, now the resistance is in retreat but still refuse to surrender.

The rebels' bravery is due to their heroic commander John Connor. However, SKYNET have sent a T-1000 Terminator back in time to eliminate John Connor. When the rebels realise the danger, they send an old model T-800 Terminator (Arnie) to protect John and save humanity.

Acclaim are currently working on the SNES version of this block buster and it's packed with awesome 16-bit graphics and a fantastic movie-style sound track. More details on this hot release next month.

EXCLUSIVE SCREEN SHOT!

Tune in for more table-smashing, gun-toting, Harley-driving action next issue!

Wordtris

If you're bored with *Tetris* your luck's in because coming soon to the SNES and Game Boy is a souped up version of the the Nintendo classic called *Wordtris*.

In this tricky puzzler each block has a single letter on it. The goal is to match up letters and make as many words as possible. To make things tougher, the letters fall into a well. When each one lands on the letter below, it sinks beneath the surface — so you need lightning reflexes.

While you're spelling words, the background shows scenes from The

Moscow Circus — weird or what! Look out for a full review of this testing brain teaser in next issue.

Unless you've been living in a cupboard for the last couple of months you'll know that *StarFox* is the hottest title around... but not for long! Soon the game on everyone's lips will be *StarWing*!

N-FORCE can exclusively reveal that for the official UK release the game's name has been changed to *StarWing* — although the incredible space-blasting action hasn't changed. Remember where you read it first!

MADE IN JAPAN

The latest instalment of the popular Rockman series — known as Megaman in the UK — has arrived on the Japanese 8-bit. The series debuted in 1986 as a tantalizingly-tough platform game needing precise timing, and delicate control.

Rockman is a Christmas favourite in Japan, consistently placing high in the year-end charts. Despite its longevity, the series hasn't undergone that many changes. Rockman 3 added sliding to our hero's limited bag of tricks (just jump and shoot), and Rockman 4 enabled him to charge his arm-mounted beam to unleash powerful energy blasts.

When Megaman's around there's always plenty of fun! In his latest platform adventure he's out to rescue Dr Wright who has been kidnapped by Bruce!

Pick a Megaman, any Megaman — eyes down for a full house,!

In the latest Rockman adventure the hero fights eight boss robots in eight stages. When defeated, each villain gives up a special weapon vital to Rockman's success. After beating them all, he goes after the ultimate baddy, Bruce, who's kidnapped Rockman's creator Dr Wright.

True to tradition, the gameplay requires plenty of skill but seems a lot easier than the third game. The boss

robots and their stage settings are imaginatively designed which is interesting as they are all based on drawings sent in by Japanese game fiends — over 130,000 designs were sent!

This is a great-looking platform adventure offering plenty of challenge but if you've already played another game in the series, don't expect anything new.

Get lost Mario

Mega news from Mindscape — the company behind *Wing Commander*, *Gods*, *Outlander* on the SNES and *Alfred Chicken* on the Game Boy — is that they've secured a licence to use everyone's favourite plumber as the star of a new 'edutainment' title, *Mario is Missing*. This is a major achievement as it's the first time a non-Nintendo company has been able to use Mario in a console game.

'Edutainment' is the word used to describe the new breed of education games that mix learning and fun such as *Mario Paint* and *Sim City*.

In *Mario is Missing*, the dungaree-clad hero guides players through the countries of the world searching for missing places, artifacts and to give a basic understanding of geography.

Although aimed at the six-and-over age group, you can bet the game will be a big hit with all games players — after all you're never too young (or too old) for Mario!

Sword Master

NES

Producer: Activision

Status: Official UK release

Sword Master is set in days of old, deep in the mists of time, when sorcerers were taken very seriously indeed and brave knights roamed the land looking for maidens to save. It's basically a side ways scrolling beat-'em-up with lots of wizards, wolfs etc to beat up.

Don't bat an eyelid! Draw your sword and prepare for battle in this tale of dungeons, dragons and damsels in distress.

Bucky O'Hare

Producer: Konami

Available: June

Status: Official UK release

Plucky Bucky's here for non-stop hare-raising action!

Based on the popular cartoon series, *Bucky O'Hare* is an action-packed platformer with loads of colour and cool animation. Each level is

packed with hare-raising antics and explosive fun all set on several different planets.

WIRED!

Nintendo's flagship 16-bit console — the SNES — has now been available in the UK for over a year with sales in excess of 700,000 machines. The games have sold by the bucket load with cartridge prices ranging from £39.99 to £120! The Sega Mega Drive was originally launched at £149.99 but is now available for £119.99 with two joypads and *Sonic the Hedgehog* and its price is rumoured to drop when the Sega Mega-CD is launched.

The prices of the American SNES and Japanese Super Famicom have dropped dramatically — the USA version is now available for only £70! Quite a drop from the £149.99 UK price tag!

If Nintendo dropped the retail price, more game fiends would be able to afford the console and the company would make more money. So should Nintendo drop the price of the SNES?

On the flip side, if the price of the SNES was dropped it would degrade the machine, making it look cheap and therefore no good.

When deciding which console to buy games players often look at price as a sign of quality. If the SNES was cheaper it would be labelled as a Mega Drive-equivalent console when we all know it is a far better machine.

Perhaps consumers don't mind paying that little extra when they know they're getting a far better console for their money?

So make your vote count! Should Nintendo lower the price of the Super Nintendo to come in line with the Mega Drive? Or should they keep the price as it is now, because you have to pay for quality?

Calls cost less than 10p and remember to ask the person who pays the bill before dialling.

You've read both sides of the story, now pick up the phone and make your vote count!

DO YOU THINK THE PRICE OF THE SNES SHOULD BE LOWERED?

20/20

IN THIS NEW REGULAR FEATURE WE INTRODUCE YOU TO THE PEOPLE AT THE THE HEART OF THE VIDEO GAMES INDUSTRY AND FORCE THEM TO REVEAL 20 EMBARRASSING, INTERESTING OR JUST PLAIN DAFT THINGS THEY THINK WE DON'T KNOW ABOUT.

This month we took a punt down the river to the sunny town of Cambridge and grabbed the programmer of Robocod on the SNES, Gary Richards. So just what are programmers like...

Gary is 22 (he reckons he looks about 16!), he learned his programming via a ZX81, Spectrum, Oric, BBC and an Amiga. He now works for Millennium Interactive as a programmer, drives a Metro, would like an Audi Quattro, is into PWEI, Carter USM, NEDS, and Genesis. He lives with his girlfriend and works very hard...

TWENTY THINGS YOU DIDN'T WANT TO KNOW:

1. James Pond's name was dreamed up by the company's Managing Director while waiting for the kettle to boil.
2. Programmers live on McDonalds' and Pop Tarts.
3. Programmers drink huge quantities of coke.
4. He once met Craig Charles in a pizza restaurant.
5. He enjoys running around in the dark shooting his friends.
6. RoboCod has sold over 1.2 million copies over all formats
7. Most programmers are not rich and don't drive fast cars...
8. ...But his boss does!
9. Millennium started in the attic of the MD's house
10. Gary wrote the intro to *Global Effect*, but no one saw it
11. Millennium helped Jim to fix it (on May bank holiday)
12. They have an inflatable mummy in the office
13. To be a programmer you must make paper planes
14. He once ate three cream crackers in a minute without a drink
15. He got a Lego chimney stuck up his nose when he was younger
16. Millennium is actually spelt with two n's
17. He got 6 O levels and 2 A levels despite being dyslexic
18. He used to be able to do a Rubik cube in about 30 seconds
19. He won some trophies for scale model boating.
20. He's in trouble for number 8

Tune in next month for more angry raving in Rant and we'll be back with Twenty Twenty in two months with another sneak peek at the people behind the games!

Taz-ma

SNES

Producer: Sunsoft

Available: June

Status: Import

Sunsoft's five-year licensing agreement with Warner Bros means they get first crack at the really hot cartoon licences, the latest being *Taz-mania* — an interactive arcade-style cartoon adventure featuring the vicious Tasmanian Devil.

The player is treated to a unique over-the-shoulder 3D view of Taz. The sprite doesn't move from side to side as you'd expect but scrolls into the screen — similar to a racing sim with Taz as the car.

Taz doesn't just run, he spins and turns into a powerful whirlwind. He also scoffs his way through just about anything and everything in his path — well, there are exceptions like trying to swallow a double-decker bus!

His favourite snack is a nice tender kiwi bird but his incredible appetite lands him in heaps of trouble. Most of the hassle comes from the love-struck She-Devil — this amorous female is more

dangerous than a bag of dynamite down the trousers and she just won't stop chasing Taz!

The special effects and scaling give a tremendous impression of speed — the way the road curves and the background moves in first-person perspective is brilliant!

The state-of-the-art animation is combined with digitized sounds and bright cartoon-style colours — there are even mini-movies sequences for you to sit back and enjoy. Add to this stunning sampled speech and sound effects and you've got one cool cart. Make sure you reserve your copy of *N-FORCE* because we've got an exclusive review in the next issue.

M. Rosenthal

The Green Cross Code, Taz style — look left, look right... and watch out for the enormous pair of inflatable gloves!

F-15 Stri

The NES version of *F-15 Strike Eagle* was so popular, that Microprose are releasing the fantastic flight sim on the SNES. Featuring the same great gameplay, improved graphics and super sonic speed it's going to be an absolute stunner!

You play a rookie combat pilot working through the ranks in the hope of becoming a crack flying ace. As a fresh-faced youngster you practice taking off, landing and target practice but gain promotion and you're sent on top secret missions to the Middle East. There's also a two-player option adding extra excitement.

The SNES has been missing a good flight sim but now it seems the wait is over. Look out for *F-15 Strike Eagle* in next issue, it's going to be high flying action.

SNES

Producer: Microprose

Available: June

Status: Official UK release

Take to the skies for hazardous missions in the Persian Gulf!

Taz-mania uses silky smooth scrolling to create the impression of speed. Although Taz stays still, the road zooms towards the screen making it look as if he is running.

Look mum, I can fly! One sight you don't see very often is a giant Tasmanian Devil floating down the middle of the road. I wonder if he's got a driver's license?

The awesome 3D mapped-polygon graphics have to be seen to be believed.

Strap yourself into the hot seat of America's hottest jet, the F-15 Strike Eagle — Tom Cruise eat your heart out!

Alien 3

NES

Producer: Acclaim

Available: June

Status: Official UK release

This game's definitely too hot to handle! Take to the sewers (below) to rescue cocooned prisoners. Use the radar to track the aliens then blast them with machine and flame guns!

Thanks to Acclaim, one of the most gripping movies of all time, *Alien 3*, slashes its way onto the NES for full no-holds-barred shoot-'em-up action. Ripley — the hero, played in the film by Sigourney Weaver — is back and she's out to destroy The Aliens once and for all.

The balding beauty roams seedy landscapes in pursuit of the alien scum — her mission is to rescue the hostages held captive within the dark bowels of the complex. There are a set number of prisoners to rescue on each mission. Once they've been saved, head for the exit or suffer the horrific consequences. At the end of each section there's a mega mother Alien to do battle with — and they're really ugly! There's a full review of this gruesome shoot-'em-up in next issue.

Bartman Meets Radioactive Man

NES

Producer: Acclaim

Available: June

Status: Official UK release

Eat my shorts! Those immortal words are back in the latest Simpsons platform adventure, *Bartman Meets Radioactive Man*. The game is full of the usual hilarious action we've come to expect from the crazy cartoon family. Expect laugh-a-minute gameplay, cool graphics and tons of sampled speech!

Aye Caramba! Don a cape and take to the skies as the new 'green' Bartman in this environmentally-sound Simpsons adventure. Make the world a pollution-free zone!

Striker

SNES

Producer: Elite
Available: July
Status: Official UK release

New from Elite is a conversion of the great soccer sim — *Striker* — and it's predicted to be the biggest football game to hit the SNES and that's a tough challenge to rise to!

The game is viewed from overhead, behind the goal, which sounds a little weird but works very well. There are 64 international sides to choose from, each with their performance based on real teams.

There's a two-player mode for thrilling head-to-head battle or enter the cup competition and play six gruelling games of football before the grand final.

In one-player competition mode the computer sets all the fixtures and calculates the results of other matches. There are a vast array of options allowing you to customise the action — you can even change the weather and pitch conditions!

Over here son, on the head! We're just over the moon about getting this great soccer sim on the SNES. There are loads of great options including an outdoor exhibition match or an indoor five-a-side tournament.

R-Type II

GB

Producer: Irem
Available: June
Status: Official UK release

Following hot on the heels of *R-Type*, is a mega-fast space-age shoot-'em-up, *R-Type II*. With improved action sequences and loads more bad guys to destroy, it's going to be the hottest blaster around. There are five bosses to kill — one at the end of each level — so expect a tough test of your game-playing skills.

BUZZ!

TAKING A SIDEWAYS LOOK AT '90s NINTENDO CULTURE!

Game Buddies!

Have you ever fancied being on the telly? I'm not talking about a face in the audience of the Paul Daniel's show but a main item in a top rating breakfast show! Yes, this is your chance of fame — Think how jealous your mates will be! The Big Breakfast are looking for two people who have become friends through playing computer

or console games for their 'Best Friends' feature. All you've got to do if you and your friend fit into this category is write in to N-FORCE telling us a bit about how you became friends, the games you play, consoles you own and any funny snippets about your friendship and we'll pass your details onto The Big Breakfast. TV stardom is as easy as that! Send your details to: THE BIG BREAKFAST BEST FRIENDS, N-FORCE, Impact Magazines, Temeside, Ludlow, Shropshire, SY8 1JW.

THE BIG BREAKFAST

Cookie Mania!

You've played the game, well now you can eat Yoshi's cookies! The latest craze in Japan — where else! — are beautifully-decorated replicas of the scrummy biccies used in the game and they taste great — just ask Nick!

Also available are chocolate mini Yoshi eggs. They come in packets of four with the added bonus of a Mario or Yoshi figure — which is definitely not edible!

And not to be outdone, *Street Fighter II* joins in the sweet wars with its own brand of bubble gum. In each pack there are a variety of delicious flavours plus two great *Street Fighter II* game cards.

Mario goes sguidgy

Has Mario ever got you so wound up that you felt like mangling his moustache and rearranging those cute Italian features? Well now in Japan there's a perfect aid to 'Mario and Yoshi-itus'. There are two cute rubber dolls and they're absolutely perfect for bouncing against walls when you get in a temper. And for those that don't get it right first time there's the handy Mario and Yoshi erasers that are so cool and brightly coloured, it's a pleasure to make a mistake.

If you want to win one of these great toys, send in your name and address to Mario and Yoshi compo at the usual address — first two out of the hat win.

Monsters

SNES

Producer: LucasArts

Available: July

Status: US import

The last SNES game from LucasArts was *Super Star Wars* — and we all know what a smash that was — so their latest game, *Monsters*, is getting a lot of attention. With an all new theme, digitized speech, sound effects, monster noises (hope they're rude ones!), a unique three-quarter aerial view and gameplay inspired by the zany humour of past triumphs such as *Maniac Mansion* and *Zak McKracken* this action/arcade parody is set to be one of the biggest games of the summer.

The game is about the 'typical' adventures of two kids (or just one player) who have to move around their town, saving folks from hideous and bizarre monsters — vampires, ghosts, dead-type Zombies, that kind of stuff! Of course you ain't defenceless, there are plenty of weapons — including bazookas, water pistols and other hi-tech junk — hiding inside trash cans and other 'obvious' places. Jump on skateboards for faster speed and head out as the screen

It's non-stop wild and wacky action in this weird and wonderful adventure. Each of the 50 levels has its own theme!

scrolls around.

The fun part is that each of the 50 levels comes with its own mini-movie theme like *Dances with Werewolves* and *Zombie House Party*. There are loads of exotic weapons, tons of special animated sequences and hundreds of chirpy cheer-leaders to save from certain doom — the first 25 levels don't repeat a single character or scene!

Every four levels the screen locks solid and you're forced to confront a 'head-honcho' monster — and these guys are big!

Especially the huge forty-foot cry-baby that stomps around and tosses disgusting, dripping bottle nipples!

We can hardly wait and you can be sure we'll be bringing you more news on *Monsters* the second we hear anything!

M. Rosenthal

This forty-foot tall baby is just one of the many horrors you can expect to see in this warped but stunning game. This nasty nipper must have a terrible case of nappy rash to be in such a foul temper! Dodge his deadly milk and then bite his ankles!

Karting around!

Forget your Dinky toys! The smart kids in Japan are racing Mario Karts. The build-your-own high speed replica Mario Karts feature all eight characters — Mario, Luigi, Princess, Koopa, Toad, Donkey Kong Jr, Bowser and Yoshi — from the brilliant SNES racing game.

There's no messing around with glue, these clever kits simply snap together in handy pieces. They're selling in Japan for about 200 yen (approx £1.20) but you can win one by sending in your name and address to Mario Kart compo at the usual address.

Guiles and boys!

The latest craze in the US is *Street Fighter II*

merchandising. Yep, our buddies from the console game are appearing on everything from watches and key chains to roller

skates and pencil sharpeners.

Tops at the minute is the action dolls range — GI Joe and the *Street Fighter II* Martial Artists. Hasbro Toys have teamed up the 'All American Hero' — GI Joe — with the Ryu crew to form a whole new line of action figures and accessories.

All of the *Street Fighter* characters are here and there are masses of extra kit to collect like Guile's Sonic Boom Tank and Blanka's Beast Blaster.

M. Rosenthal

Dr Franken 2

Poor Franky needs a hand — look there's one behind him! The huge 2-Meg cart means there's plenty of great graphics, fluid animation and hassle-free gameplay.

GB

Producer: Elite
Available: June
Status: Official UK release

Following hot on the heels of the hugely successful *Dr Franken* is its sequel, imaginatively titled *Dr Franken 2*. This spooky strategy-based collect-'em-up is hitting the headlines as it's a 2-meg cartridge — making it twice as big as most Game Boy carts in the shops!

Dr Von Frankenbone — the wacky scientist that created Franky — can't afford to pay his huge electricity bill so property developers are coming to demolish the house. The doc really needs Franky's help but unfortunately, the macabre monster has been locked in a haunted out house by the local residents

Franky's first task is to find the

backdoor key and escape, then search the house and grounds for his beloved Dr Von Frankenbone. The highly-charged mission takes him through 7 new locations, 140 rooms in 12 different building and 6 large areas of arcade-standard scrolling — phew!

Judging by the popularity of the first game, *Dr Franken 2* is sure to be a hot summer hit. We'll be giving it the N-FORCE treatment next issue so stay tuned for an in-depth review.

In the firing line

There are plenty of gadgets around for the SNES but one of the best is a clever convertor from Ice Distribution. The adaptor is ideal for playing Japanese and American games on your UK PAL SNES, plus it also gives corruption-free viewing of those nasty DSP (Digital Signal Processor) chip games like *Mario Kart* and *Pilot Wings* that other convertors can't handle.

The PAL Booster is a useful gadget if you want to play your American/Japanese SNES on a UK non-SCART TV. Finally, there's a new turbo pad — The Super Famous Card — which is similar in style to the official SNES pad but with four, three- speed turbo buttons and a slow-motion option.

All three are available from Console Plus. The adaptor is priced £12.99, the Pal Booster is £24.99 The Super Famous Card is £14.99.

Nosferatu

SFC

Producer: Seta
Available: June
Status: Import

MADE IN JAPAN

Here's a quick peek at the 16-megabit horror show slated for July release in Japan.

Nosferatu from Seta — the brains behind

Exhaust Heat II (check out the preview on page 6) — looks to be a real nightmare. It's gameplay fuses the smooth dynamics of *Prince of Persia* with the terrifying settings *Castlevania IV*.

As in *Prince of Persia*, the main character is extremely smoothly animated — there over 350 movement patterns in all! Your job is to guide the hero through six stages of gloom and doom in search of a horrifying collection of supernatural beings and beasts who have kidnapped his girl friend and are keeping her as a tasty midnight snack for *Nosferatu*, the vampire.

As this looks to be a real winner with plenty of fantastically-detailed spooky graphics, we'll keep you posted on any further developments.

Norton Kai

This fire-breathing beast is just one of many evil enemies you meet in this thrilling adventure into the world of the undead!

Handy hardware

Two bits of kit are about to hit the shops from Spectra Video. The Megastar is a new joystick for the NES featuring industrial strength micro switches, autofire, slow motion and a sturdy steel shaft it's available now priced £29.99.

Also arriving on the shelves about now is the Spectra Video *Multi-Case* this neat little holdall does just that and is styled in black, cushioned nylon. The manufacturers reckon that some of the things you can store in it include — dead cats, mouse mats, kipper ties, pork pies, favourite mags, 500 fags, socket sets, more dead pets and of course just about anything for your Nintendo including the deck itself. Pick up and pack your *Multi-Case* for £16.99.

and FINALLY...

Codies confusion!

Apologies are in order to Code Masters for the review of *Quattro Sports* on page 85 Issue Nine of N-FORCE. We forgot to mention that it was an American version of the game we looked at. The official UK release uses the unique Code Masters Plug Thru system and it therefore retails at a very appealing £29.99 — not the import price of £44.99. This of course means it's even better value for money than an off-season weekend at Butlins.

Popeye 2

GB

Producer: Activision

Available: June

Status: Official UK release

Your favourite cartoon sailor is back in another wacky adventure full of spinach, mirth and mayhem. In this portable platformer you have to save poor Olive Oil from a terrible fate, beat up Bluto and eat lots of spinach. Oh it's a life on the ocean waves.

Galaxy 5000

NES

Producer: Activision

Available: June

Status: Official UK release

Galaxy 5000 is a madcap sci-fi racing game with plenty of high-speed action to keep you hanging onto the edge of your seat. The space age crusade begins when you start zooming round different planets — doing battle with other racers around a *Star Wars*-style desert terrain. *Galaxy 5000* is in the shops soon — so look out for it!

Don't grab Gradius

Stop! All you game fiends who are about to go out and buy the classic shooter *Gradius* on the Game Boy should know that this is the same game as the official UK release *Nemesis II*.

Some unlucky punters have already been caught out — why, oh, why do companies persist in changing game names? It only leads to confusion and heartache when unsuspecting gamers find they've bought the same cart twice. It can cost a bundle too, as most retailers won't exchange carts no matter how much you plead. So on behalf of the dozens of callers we get every month — don't get caught out!

Battle of Olympus

GB

Producer: Playtime

Available: June

Status: Official UK release

Battle of Olympus is a God game in which a young Greek character travels the land finding new adventures. If you're as power crazed as the average PE teacher this might be just the thing for you! It's out on GB next month — so watch out for a full review.

Card Tricks!

Watch out for a new 100% official collection of Nintendo cards with hints and tips for a wide range of Nintendo games — from Mario classics to *StarWing*. Our friends at Merlin Publishing are behind the collection and we know they're worth looking out for because Merlin got the N-FORCE team to write and design them. Enjoy!

CHART attack!

Here they are — the hits on three continents live and direct from the people who really count. *Super Mario Kart* is still leading the field in the UK SNES charts but the rest are gaining fast!

Hot of the press is a high-energy remix of the soundtrack to the popular Nintendo ad — *The Evolution Of The Player* — which featured *Terminator 2*-style special effects. The single, *Will You Ever Reach The End* has been written and recorded by High Score Warrior — otherwise known as Rod Adams.

Rod taught himself how to play guitar when he was only eleven and within a year he'd joined a band. He left school and took several jobs before deciding to train as an electronics engineer and from there he went on to design test rigs for communication satellites — as you do!

Working warrior

But communication-satellite-test-rig-designer just doesn't have the ring to it as musician — it's got a few more syllables to start with — so he decided to get a job that at least fitted on his business cards!

Yes, Rod had never been able to get rid of that lust for stardom so he made a go of it as a musician and after a short while writing music for documentaries and commercials got the chance to work on the *Evolution Of The Player* Nintendo advert.

To celebrate the release of *Will You Ever Reach The End* N-FORCE has a mass of CD singles to give away. All you have to do to win these cool

sounds is fill in the coupon and send it to: HIGH SCORE WARRIOR COMPO, N-FORCE, Impact magazines (UK) Ltd, Ludlow, Shropshire, SY8 1JW.

● The first 100 entries out of the hat will each win a CD — so get scribbling.

Just what have those wild and wacky Japanese been up to lately? Raiding supermarkets, grabbing boxes of soap power and tins of beans to look at the barcodes?! Norton Kai does his weekly shopping and investigates...

Behind

Barcodes, those black-and-white vertical stripes with numbers underneath that you find on almost everything at the shops, are all the rage with Japanese kids these days. The craze started about a year ago with Epoch's Barcode Battler, a handheld barcode scanner with a small LCD screen.

The Barcode Battler seeks out barcodes with the strongest battle specifications and deduces a barcode's attack points (AP), defense points (DP) and hit points (HP). This data is then used as a 'warrior' against another barcode 'warrior' to determine which is the stronger of the two — a pretty simplistic system, but enough to send thousands of Japanese kids out to the shops in search of the ultimate barcode 'warrior' — one brand of noodle with a particularly strong code sold out for months!

Unfortunately, in their quest for strong warriors, kids began tearing barcodes off products in shops ruining hundreds of pounds worth of stock. As a result, shops began screening kids especially in locations close to schools

and kindergartens. As the children weren't shop-lifting, just taking barcodes, they didn't feel particularly guilty about defacing merchandise — naturally, retailers thought otherwise!

On the band wagon

Japanese toy makers quickly took advantage of the craze. Bandai (Nintendo's ex-distributor in Japan) brought out their own handheld unit — Super Barcode Wars — which features a multi-scanning system that can take data from not only barcodes but also photos, and illustrations. It can store data for up to five characters, who can be entered in a battle royale to see who comes out on top, or in an RPG mode with warriors, wizards and helpful items.

Multiple modes

The success of Super Barcode Wars forced Epoch to update their original unit. The Barcode Battler II has three modes: one in which two barcodes compete against each other; an RPG mode for clearing stages against the computer using supplied character

barcodes; and a mode where the supplied character cards are matched head to head.

This battler also converts new barcode data into warriors, wizards and items with specific attack strengths, defensive powers, magic powers, spells and hit points. Several barcodes can be moulded together to make powerful characters. The barcode-generated characters can attack, parry, use spells or items all controlled by the player, adding more depth to the gameplay.

On these handheld units, numerical and text data are shown on their LCD screens. Software makers took quick note and developed interface kits to be used in conjunction. The first title to hit the shelves was Sunsoft's Barcode World for the NES. It comes with an interface and cart that hooks up to Barcode Battler II. The NES cart adds a whole new library of data including 140

types of weapons, armours, shields and items matched to barcodes. In much the same way as the handheld, barcodes can 'fight' other barcodes complete with colour graphics of futuristic robots representing the players. There's also an RPG mode where barcode data represents a party of characters who go out on twenty quests and ultimately save the world.

Super Nintendo coding!

Soon to be released is Epoch's own SNES interface kit for use with the Barcode Battler II. This unit is expected to be designed in much the same way as Sunsoft's NES title. The RPG aspect of the game will be beefed with a war sim-style field map.

Namco have recently brought out their own Barcode Boy system which slots onto a Game Boy and displays barcode 'warriors' together with numerical data representing their

strengths on the handheld's LCD screen. In all other regards the gameplay is not much different than Epoch's and Bandai's handhelds.

It appears Epoch will soon be introducing the Barcode Battler II in the UK in the hope of repeating the Japanese success. Will your supermarkets be invaded by hordes of kids tearing up packets of noodles in search of the ultimate barcode warrior? Let's hope not.

This special add-on for the Game Boy is from Namcot. The Barcode Boy plugs into the cartridge slot for hours of fun with barcodes from your mum's shopping bag!

One of the battle screens from *Barcode World* with two of the monsters and all their strengths and weaknesses — pity it's all in Japanese!

Barcode monsters look just as vicious on the Game Boy! Here we have one of the screens from Namcot's Barcode Boy.

Those boffins at Sunsoft in Japan came up with a whole world of barcode battling for fans. Here's the world map showing all the planets that can be visited.

The item screen from *Barcode World* is full of useful game information. Each item and monster is illustrated with their own icons.

**N-FORCE
KNOCKOUT**

To help you spot the awesome games from the merely brilliant, we've introduced an addition to our ratings system. Any game with a **FORCE RATING** of 90 or above is highlighted in green, instead of the usual red — just check *StarFox* (on page 32) to see what we mean.

Not only that, each game also gets a **N-FORCE KNOCKOUT** gold medal — the ultimate seal of quality! So why hasn't *StarFox* got one? We didn't think Nintendo would want one for their box!

THIS MONTH'S
GAME AVERAGE

StarFox, *StarWing* — call it what you will — should be in the shops now for less than £40.00. It's the flagship of Nintendo's next generation of custom-chip based games and — as such — most industry pundits were of the opinion that *StarWing* was going to be on-sale at a base level of around £60.00.

It's really great to see that Nintendo are rising to the challenge of advanced game technology and keeping cart prices pegged at an acceptable level.

Some people will find it strange to hear this magazine openly praise Nintendo. Why? — because **N-FORCE** isn't officially licensed or endorsed by them — that means that we don't pay Nintendo a "license" fee for the right to use their name and conversely they don't give us any games to review or provide technical support to our editorial team.

Don't get us wrong — we're not having a moan! — there are loads of magazines around and it would take Nintendo absolutely ages to support them all properly — at the end of the day it all costs money. Nintendo chose one magazine they liked and now it pays for Nintendo's commitment and service. Fine.

N-FORCE is happy to review games without a helping-hand — that's what being at the leading-edge is all about! Be sure to check out next month's mag for some important expansion news!

TERMINATOR

Arnie swore he'd be back — and now he is! With Harley roaring and Uzi blazing the ultimate killing machine makes his SNES debut. Here comes trouble...

Kyle Reese is a rebel soldier from a war-torn future, where humans are fighting a losing battle against The Machines. The survivors have spent years battling to free their future and now they have a chance to win.

The rebels have discovered a time-travelling device built by the robots. A Terminator has already been sent through it. Its mission is to kill Sarah Connor before she gives birth to her son, John, who becomes a formidable resistance leader in the year 2029.

Kyle's job is to follow the Terminator through time back to 1984 and protect Sarah Connor from its psychotic mechanical clutches.

The Mindscape conversion of this classic sci-fi movie starts with the player taking the role of the Terminator in 2029. Destroy the rebels stronghold and a giant caterpillar-tracked robot jumps into your way — plenty of mega blasting is needed to polish this baby off!

Survive to fight another day and the game swaps characters — you're transformed into Kyle Reese and transported back to 1984. The search

for Sarah Connor takes you through the buildings and streets of Los Angeles. If you manage to blast your way past the multitude of enemies and rescue Sarah, there's a final car-based shoot out waiting.

Throughout the game levels are split up by cool digitised film stills.

End of the first section of action and time to deal with the inevitable boss — a huge intelligent tank!

Kyle is transported back in time to 1984 to protect Sarah Connor from The Terminator. Watch out for the guys on the roof-tops — blast them with the shotgun.

Power-ups and bonuses are scattered all over the first level. Memorise their location because they're essential to survival

MINI-REVIEW: TERMINATOR

ROB: 'This cart should be terminated!'

Recently film licences — *Alien Vs. Predator* and *Lethal Weapon* for example — have had an unfinished and uninspired feel about them.

Sadly, *Terminator* is another one to add to the list. The gameplay is far too difficult, there are not enough power-ups and too many limitations. The levels don't follow the film closely which is confusing, the sound is monotonous and each stage is extremely long and boring.

The graphics aren't that bad but they don't show off the SNES to its full potential. The backgrounds are dark and dreary, with only the odd explosion brightening things up a bit.

Terminator is a perfect film to transform into a game but this version is very tiresome and incredibly frustrating. Although the graphics and boss sequences are pretty good, the poor gameplay prevents me from recommending this game.

ROB 54%

Apparently, *Terminator* is a critique on man's ability to confront destiny and alter fate... and I always thought it was an excuse for Arnie to show off his biceps, grab a big gun and blast everything in sight — Oh well, Hasta La Vista, baby!

Battle through Level One then climb into a beat-up pick-up truck and blast the massive flying enemy droid. If the truck is destroyed the game's over!

ARNIE'S ICONS!

You've been sent back in time by your leader to save his mother so that he gets to be born. It turns out that you are his father too! You need all the help you can get!

First Aid: these handy medical packs boosts health. With all the shells flying about you need it!

Hidden Weapon: basic power-ups look like this — shoot them to reveal the type available.

Grenade: these are your main weapon and they're essential for clearing your way though mine fields!

Rapid Fire: this handy boost to firepower is ideal for wiping out masses of enemies

Special Weapon: grab this extra-special icon for a super weapon — make the most of it!

Nail the Terminators and watch out for the bomber planes and their deadly cargo! The best option is to run through the stage as fast as possible!

Obviously getting into the truck was a big mistake, now the droids are bigger and have more fire power — keep blasting!

Kneel down, take aim and wait until you can see the rivets on his Levis! Shooting someone at this range brings tears to your eyes — not to mention his!

TERMINAL TRIVIA

Unleashed on the public in 1984, James Cameron's *Terminator* was poorly received at the box office. Hardly suprising when you consider that it was up against the likes of *Beverly Hills Cop* and *Indiana Jones and the Temple of Doom*. But as in 1982 with *Blade Runner*, *Terminator* quickly became a cult movie. The film helped establish the acting career of Arnold Schwarzenegger, who was previously only known for his sword-swinging, camel-flattening biceps in the *Conan* movies and as a crummy cowboy alongside Kirk Douglas in *Cactus Jack*. *Terminator* introduced millions of movie goers to for the ex-world champion body builder from Austria and ever since he has dominated the film industry — and he's still going strong!

CHRIS: 'I won't be back!'

I'm a big *Terminator* fan so I couldn't wait to see this game. When I heard the familiar intro music I could hardly contain my excitement — I was running around the office like a man possessed! When I finally looked closely at the screen all my dreams faded. The huge sprites I expected are absolutely tiny and the backgrounds are dull, dreary and very sketchy.

Okay, so it's nothing special to look at but surely the gameplay makes up for it — think again! The levels are huge — I mean massive — which would normally be a good thing but they're lifeless. I spent ages running around blasting everything in sight but never seemed to get anywhere. When I finally reached the end of the first stage, the level boss wiped the floor with me in about two seconds flat!

This isn't just sour grapes — the whole team spent hours with the game and we all agree the difficulty setting is ridiculously hard. No matter how big a film licence is if the gameplay is frustrating there's no way a cart is worth splashing out £40 on.

Mindscape have produced some brilliant games in the past — *Alfred Chicken* is a stunner — but *Terminator* definitely isn't one of them. Let's hope *T2* is much better!

CHRIS 53%

Dodge the enemy fire by jumping onto the raised platforms. Walk underneath the big guy at the top of the screen and blast him with both barrels of your shotgun!

Bang! You're dead! That'll teach him to laugh at the colour of your overcoat!

It's time to go back to 1984 and rescue Sarah and John Connor

As soon as you get off the truck to deal with the enormous attack droids — they disappear! Never mind, save your ammo for the next level!

Prepare for take off, full throttle on the afterburners and shoot to kill. The first Super FX game blasts onto the SNES leaving the competition light years behind. Is this the best game ever? N-FORCE reveal all...

The once peaceful planet of Corneria is under attack from the evil Emperor Andolph and his ruthless gang of space mercenaries. The planet's only hope of survival is StarFox squadron — an elite group of animal space fighters dedicated

to preserving interstellar peace. These group of top guns are; Fox McCleod, Falco Lombardi, Peppy Hare and Slippy Toad and they're the toughest bunch in the galaxy.

In this dazzling 3D shoot-'em-up, you play the leader of StarFox

squadron, Fox McCleod, and command the group through a variety of deadly missions.

The number of levels varies depending on which of the three difficulty settings you choose — though the first and last levels are always the same. To give you an idea of how big the levels are, Level One — the battle to reach Venom — is made up of six stages. Playing all three difficulty settings in the game means taking a total of 20 missions — enough to test the mettle of even the toughest hot shots.

Most stages feature a behind-the-ship perspective but you can switch to two other views — one inside the cockpit

STARI

Flashy flying is needed to duck and avoid the moving bars inside the space station. One wrong move and the ship ricochets around.

Entering the end of the space station the SNES goes into an automatic sequence of tunnels and multicoloured tubes. Scary stuff eh?

These huge robots are going about their daily business, moving girders from one place to another — but blast them out of the way anyway!

NICK: 'The ultimate blast!'

Being the first Nintendo game to use the new Super FX chip, *StarFox* has certainly had a lot of hype. I'm glad to say all the research and development that's gone into this new Nintendo invention has definitely paid off — this is a new dimension of console shoot-'em-up!

Landscapes, enemies, power-ups and guardians are created from hundreds of 3D shapes then rotated and scaled as you fly by in the *StarFox* fighter. Add to this Mode 7 graphics on asteroids and explosions and you've got one hot piece of kit!

There's plenty of depth in the gameplay and enough options to cater for all skill levels — the training mode for brushing up on ground-skimming skills and target practice is excellent!

The visuals are stunning, the scrolling is silky and with the atmospheric soundtrack playing *StarFox* is an incredible experience.

I've played hot shoot-'em-ups before but nothing has ever come close to this — I just can't tear myself away! One of the best games I've ever played — I can't wait for the next Super FX release. **NICK 94%**

To ease you into the action there's a screen displaying joypad and button functions and a gentle training mission allowing you to try out the controls and weapons.

Slippy: a slimy toad with horrible warts! No matter how desperate a situation seems Slippy always looks on the bright side. He is famous for his fancy flying which usually puts the team in danger.

TECHNICAL TALK

The Super FX chip (incorporated, for the first time in *StarFox*) has been developed by Argonaut — a British company famous for developing 3D games. A cart using the Super FX chip is able to rotate and scale sprites and backgrounds — the well known Mode 7 SNES feature — at a much faster rate than normal. This means game action can be speeded up to arcade standards.

This all sounds great, but how does it work? In simple terms, the SNES processor is speeded up — to 10 MHz (megahertz) compared to the 3.58 MHz the SNES normally runs at — so it can cope with the complex maths needed for 3D filled-polygon animation.

What all this means is Nintendo is one step closer to making arcade-quality games available for the 16-bit console — which can only be good news for game fiends!

STOP PRESS

The latest news from Nintendo is that the UK pal version of *StarFox* will be called *StarWing*. Gameplay will remain identical though.

Clever flying through the arches is rewarded with loads of bonus points. Of course it can also loose you a wing so it might not be such a good idea!

ROB: 'Sheer masterpiece!'

I'm not one to be taken in by hype but after playing *StarFox* I can see what all the excitement is about. Some of the sections remind me of the flying levels in *Super Star Wars* which is a great achievement, but *StarFox* goes one step further. Gameplay is breathtaking — jetting through asteroid belts and crowded space lanes really gets the adrenaline pumping!

I found the training mode very useful. Mastering the controls is essential, especially when you need to pull 360 degree rolls through tiny gaps at light speed. There's only one word to describe the graphics — awesome! The shading on the polygon-mapped space ships is incredibly realistic, the high-power explosions are phenomenal and the up-beat music sets the perfect atmosphere for alien blasting. If you buy one game this year, make sure it's *StarFox* — your senses will love you forever!

ROB 91%

WHO'S THE BOSS?

No shoot-'em-up is complete without mega-huge guardians to sort out. *StarFox* is no exception and has some of the most impressive enemies ever seen. Take a look at these...

BOSS 1

This mothership sneaks up behind the squadron to give a surprise attack. Blow away the flashing targets on either side then simply blast away at the tank shape that charges at Fox.

BOSS 2

On the either side of this crusher are wings with four pods. When they flash red give them a mega-blast then avoid the masses of flying missiles.

BOSS 3

At the core of the mothership is a rotating drum filled with laser fire. Destroy the power links on the walls while avoiding the operator then blast the core.

BOSS 4

Spiders make most people squeamish but this one is especially ugly. It has razor-sharp legs that need to be blasted. When hit he spins so watch out!

ET AL!

These are the Level One guardians. Levels Two and Three have more terrors in store for unsuspecting players. Get your missiles out and blast away!

Complete a level and the damage of each team mate is assessed. Don't kill off your friends, they are essential for those tough later levels.

Here's Mr Fox at the bar — not the one in the pub but a great big menacing one that is about to go through his windscreen. Help!

The doors inside the space station open automatically. It's a good job really or else Fox would blast through them!

More spinning girders that just always seem to be in the way. It's like driving down the M25!

FISHY CHIPS

You've probably heard the rumours but now it's time to put the record straight. This amazing new Super FX chip game will NOT work with the majority of cartridge adaptors! If you look at the socket on your adaptor you can check whether yours is one of them.

The imported *StarFox* cart uses the side connectors to send information into the SNES. So, if your adaptor only has the middle connector and no small side ones, all you will get is the title music and no graphics!

To solve this problem you need a special adaptor that includes the two side connectors — for example the Games Master convertor. A far better idea is to buy the official UK cartridge scheduled for release this month.

Holy moly! It's a giant flying mouse! Will the caped crusader p-p-pick up a penguin? Will Robin ever get a game of his own? Will Batman return? All is revealed...

As the velvet cape of night falls over the snow laden streets, Gotham City prepares for another night of terror at the hands of the clown gangs. It may be Christmas but no one is celebrating.

As the people of Gotham gather to hear the plans for their future from twisted tycoon Max Shreck, a strange shadowy creature creeps from his haven deep in the sewers.

The Penguin is back! Abandoned as a baby, due to his deformed body he is now insane. He has returned to wreak havoc upon his family and the race that spurned him — and he's not alone!

His latest accomplice is the savage and sadistic feline fanatic, Cat Woman. Once meek and mild, she's been hurled into trauma-induced psychosis by the only man she trusted — Max Shreck — and now she's out for revenge.

With the authorities powerless to intervene only one hope, one saviour, one man can come to the city's aid. This dark hour needs a dark hero. Batman — The Dark Knight — returns...

Taking place over seven levels this is a standard beat-'em-up with the attraction of an into-the-screen 3D race-an-blast sequence. As Batman you

The caped crusader has a cool selection of moves to use against his foes. This cape spin knocks over anything or anybody in range, but it uses up loads of energy!

NICK: 'A bit disappointing'

I was all excited when I heard *Batman Returns* was coming into the office. The preview screen shots looked brilliant but when I saw the finished game I couldn't believe my eyes!

The game is visually excellent from the atmospheric backdrops to the slick animated sprites and cool bat logo effect when changing levels. The trouble is that it plays like a dog! Walk left, walk right, jump, punch. Haven't we seen this all before?

Just as I was about to give up on the game I came to the Batmobile level where the idea is to blast away anything that moves. This again looks quite impressive but has nothing new or stimulating to offer.

Batman Returns does excel in the sound department though — anyone who has seen the movie will recognise the music straight away. Beautiful synthesized sounds fill the speakers in stereo. If there was a sound test option I would have used this instead of having to play the game!

If you are a fan of beat-'em-ups or Batman you may consider this an essential purchase. Anyone else should save their money for a more original and playable game!

NICK 73%

take on killer clowns in the first stages. There are fat ones, thin ones, stilt walkers, clowns with rocket launchers, clowns on bikes — the list is endless. Later in the game you confront Cat Woman and The Penguin supported by his missile-armed minions. Each level is introduced by a short movie-style sequence including excellent digitised stills from the film.

As the winged wonder you are often in need of help so look out for power-ups including energy, lives, bat-o-rangs and a grapnel gun. What do you mean *Batman Returns*? He never went away!

This is what happens when Batman doesn't look where he's going! Somebody call an ambulance quick! He's going to need a few stitches!

If you battle through the first five levels of beat-'em-up action Batman gets to jump into his Batmobile and go for a spin through the streets of Gotham City. The Penguin's henchmen are soon out to stop him though.

BATMAN RETURNS

The enemies come in all kinds of weird shapes and sizes! If Batman doesn't get squashed by the giant clown with a huge bum, the stilt walker sets fire to his cape with a fiery torch. Gosh! Life's tough when you're a super hero.

One of the best parts of the game is the show-down between Batman and the stunning Catwoman — nice leather suit!

Although she looks harmless, this sadistic feline takes great pleasure attacking Batman with her leather whip!

ROB: 'Standard beat-'em-up with frills!'

No sooner does Batman kill one enemy than another comes along. This time it's the dreaded and feathery Penguin that hounds the city with his evil hoards of fanatical kamikaze followers. Throughout each level there are a terrific number of thugs to beat up.

The beat-'em-up sequences are very polished but offer nothing spectacularly new. The Batmobile sequence is much more fun — shame it doesn't last longer!

The animation throughout the whole game is superb, each character is well detailed and very colourful. The sound is typical of the movie very fast moving and an ideal accompaniment to the action sequences.

However, despite all this I couldn't help but feel disappointed by the game's lack of originality. Beat-'em-ups get very boring after a while even if the graphics are pretty amazing. So there's the choice — if you crave graphics and sound this will blow your mind but if you're after an original title with great playability, look elsewhere.

GRAPHICS

SOUND

PLAYABILITY

LASTABILITY

FORCE FACTOR
A great platformer let down by occasional screen flicker.

Move over Colonel Sanders, there's a new chicken in town! Alfred, the Kentucky-fried super hero, struts his stuff in an all-new platform extravaganza and it's finger lickin' great!

Enter the world of Alfred Chicken, a tender young chicken with a mission. In true platform tradition, the aim is to collect all the stars in a level then escape to a bonus stage — sounds like a piece of cake but each level is full of spinning nasties and clockwork mice out to stuff you!

So what can our poor, defenceless feathered friend use against these ferocious foes? A simple peck doesn't have any effect but Alfred's torpedo-style nose-dive attack is ideal for dealing with awkward enemies.

There are balloons hidden around the levels which, when pecked, save Alfred's position. Switches turn blocks on and off, enemies regenerate when Alfred walks off screen and there are lots of hidden extras and bonuses to

Hey you mouse! Get out of my way or I'll peck your eyes out and go cockadoodledo!

find.

It's difficult to come up with original ideas for platform games these days but Mindscape are definitely onto a winner with *Alfred Chicken*.

What out Alfred! One wrong move and it's off to that chicken McNugget box in the sky!

Each level is packed with wild and wacky characters to peck. The springs (bottom left) give Alfred Chicken a lift to high ledges. He can also soar into the air then come shooting down to the ground like a missile. Wow! What a plucky chucky!

CHRIS: 'Definitely no turkey!'

Forget the stuffing because this little chicky is most definitely alive and kicking. If it's finger-lickin' portable platform action you crave, this tasty morsel has got it by the bargain bucket load!

Format is nothing new, but the gameplay is excellent and Alfred's dive-bomb attack is hilarious. The idea of pecking balloons reminds me of *Road Runner* on the SNES but *Alfred Chicken* is a funnier game to play — the way Alfred bounces around the screen like a *Sun Valley* pinball is superb!

As each level is made of stages linked by doors, and most of the backgrounds look the same, it's very easy to get lost — thankfully you don't have to repeat sections if you die.

There are few viewing difficulties caused by occasional sprite flicker and dodgy shading which is very frustrating. However, apart from these minor niggles *Alfred Chicken* is a fun platform game that will delight all handheld owners. If you've finished *Super Mario Land 2*, give this a go.

Aww! Poor Alfred looks a little sad. He's got no clockwork characters to play with, only a blade of grass. He shouldn't have pecked them all away should he?

It's for you-hoo! In a break between levels, Alfred phones his agent to discuss the new chicken fingers advert!

These platforms whizz around the level linking up the game. Standing on them is tricky so always try to hover first.

In this bonus room the object is to leap on the springs and collect as many stars as possible. When you've grabbed them all make your way to the door (bottom left) leading to the next level. If you've got time have a chat to the toy soldier!

ROB: 'It's boootiful!'

I can't remember playing a game that has a chicken as its main character — some are pretty foul but no chickens! *Alfred Chicken* is a Game Boy platformer with interesting twists in the gameplay. The variety of moves is excellent, Alfred's nose-dive attack is a great touch and the hidden exits give the game a *Mario* feel.

Game Boy graphics are put to good use with plenty of excellent animation — when Alfred dies (or clucks it!) feathers fly everywhere, then he returns as an egg and hatches. The jolly music is a perfect match to the fun feel of the game. *Alfred Chicken* is an original and very addictive platform game that will appeal to all games players.

ROB 86%

Reach the end of the level and the lovely flower puts a rocket up Alfred's bum and sends him on to pick up as many bonuses as he can lay his beak on. The graphics and sound are really amazing!

What are snails famous for? That's right! Being slow. This is great news for Alfred because he can peck the little blighters before they can do him any damage. Don't forget to keep collecting those delicious diamonds!

SUPER TETRIS 2 + BOMBLISS

The age-old game of blocky fun from the Game Boy now comes to the SNES in glorious technicolour and with an extra explosive puzzler bolted on!

Tetris — the game that spawned a thousand rip-offs — has finally arrived on the SNES. For the few that don't know what Tetris is all about, the aim is to mix and match falling blocks to form horizontal lines.

When a line is completed it disappears and the mass of blocks drops down the screen. As the game progresses, blocks fall faster and the game is over when blocks reach the top of the screen.

The game features A, B or C game types which progress in difficulty by giving different screen effects as you play. Blocks rise from the bottom making creating lines much harder and on the later skill levels the blocks fall at an incredible speed!

The SNES version is in beautiful full colour, with wonderful scenic backdrops of waterfalls, and features an extra game — *Bombliss* — in which lines of matching blocks explode

leaving devastation and lots of points.

There are two sections to *Bombliss*: Contest, where the aim is to clear thirty progressively-difficult stages by using the built-in mines to blow away lines; and the mind-boggling Puzzle game, giving you a pattern of blocks and a set amount of moves to destroy the whole lot.

When the blocks reach the top of the screen the game is over. Watch the top window to see the next shape to drop.

CHRIS: 'Non-stop addictive action.'

Okay, I admit the thought of Tetris on the SNES made me laugh. I mean, converting Game Boy games to the SNES is like buying a Ferrari and fitting a Mini engine! However, a couple of games was enough to convince me that the Mini engine has been given one hell of a turbo boost!

If you're expecting a straight conversion, you'll be pleasantly surprised. The extra game — *Bombliss* — is a great title in its own right and Tetris is as brilliant as always.

To be honest, the addition of colour doesn't make that much difference. Tetris has never been about great graphics, just honest addictive gameplay and this cart maintains that tradition admirably.

Critics will say it's not worth the money. They may have a point, but two games with five different game types is a lot more variety than most carts are offering.

If you're prepared to sacrifice graphics and sonics for playability and lastability, Tetris will give you many hours of timeless fun. **CHRIS 77%**

This awkward Z shape fits perfectly in the bottom right corner of the puzzle — you see it's easy isn't it!

Rotate blocks to fit into gaps. Turn this horizontal piece into a vertical block and slide it into the left side of the puzzle.

CHRIS Good fun for a couple of games but quickly becomes boring — pity the questions are about America!

CARL The answer is... buy another game because this is terrible, trite rubbish of the worst sort!

GRAPHICS
 Colourful with really dodgy animation

SOUND
 Terrible quiz show-style music — sampled speech

PLAYABILITY

LASTABILITY

FORCE FACTOR

JEOPARDY!

Who wants to be a millionaire? Now's your chance to test your general knowledge and be a TV star. Get that trigger finger on the buzzer and prepare to win a fortune!

Adapted from the quiz first screened in America — but now on daytime TV in this country — *Jeopardy!* makes its console debut on the SNES.

Gameplay follows the same format as the TV show, except you play for points instead of cash! For those who've never had the pleasure (or been spared the misfortune!) the aim of the game is to answer questions on a variety of subjects giving your response as a question — Americans always have to confuse things don't they! For example, if the quiz-master said, 'The best Nintendo mag in the world,' we would all shout 'What is N-FORCE?' You see, it's easy!

Begin the game by choosing one of five contestants each dressed in woolly jumpers and sensible shoes, although their clothing doesn't effect their IQ level — good job really!

An extra bonus is the three-player option (the third player shares a controller) making for trivia battles against friends or family. After the players have been picked, the game screens flash subject categories — if you can't find a topic you know anything about, a quick press of [SELECT] brings up a new set of categories. When you're ready, the game begins and the first player to press their buzzer gets to answer. Each question in the category gets progressively harder and scores more points, but if you get

an answer wrong the question's value is deducted from your score — so if you're not sure, keep your mouth shut!

After all the questions have been used up, the game turns into Double Jeopardy (double points!) and after that Final Jeopardy — the grand final — where the contestants can gamble their winnings on a deciding question.

Choose a character and enter your name — although each player looks different they are all equally matched.

ROB: 'Save your cash!'

Things are getting really desperate when an American quiz game is converted to the SNES — whatever next, a console version of *That's My Dog!*

The action is very slow — inputting answers takes ages and quickly becomes boring — and the sketchy graphics give the game a naff daytime-TV feel.

There are all the standard subject categories — History, Pop Music, The Movies etc. — and some pretty obscure ones that make gameplay very frustrating.

The badly-animated quiz-master quickly becomes annoying and the contestants look like the cast of *Bay Watch* — they're very quick on the button though so you better have your thinking head on!

The theme music is a typical quiz show tune — dreadful! It's repeated endlessly and drives you absolutely barmy. My advice is to stay well clear of this game. It's okay for an afternoon's entertainment but nowhere near worth the £50 price tag.

PIRATES

Ahoy there! Get yourself a false beard and an eye patch and set sail for the seven seas. This role-playing adventure is just like taking a world cruise — there's even a giant swimming pool with a plank for a diving board!

Everyone dreams of becoming a pirate at some time in their life — the open seas, the treasure chests full of gold, the parrot poo down the back! What? You mean you never did? Oh well, we're a strange lot here at N-FORCE!

This role-playing adventure from Konami gives all potential peg-legs the chance to live out their fantasies. After selecting the relevant options for time period, skill level and family name, it's straight in at the deep end with a ship to sail around the Caribbean and a crew to manage.

The objective is to become rich and famous, marry a beautiful woman and make a name for yourself in the world of buccaneering — highly sexist I know, but there were never many women pirates!

The adventure starts in a small town and you have a variety of options to select — visit the town governor for advice and maps, buy handy items from local merchants, or take a trip to the tavern where your crew can eat, drink and make merry!

The action is split between arcade-style sequences where swords are drawn for a swash-buckling fight to the

death, the open seas where the ship sails around various coastlines and text-based role-playing sequences illustrated with animated pictures.

A life on the ocean wave! The pirates chase a ship in an attempt to steal any treasure that might be aboard.

ROB: 'No buried treasure here!'

Argh! Hoist the Jolly Roger and splice the mainbrace. Wow! When I read the instructions to *Pirates* I got really into the whole pirate scene — erm... sorry about your leg Nick!

The thought of sailing the seven seas, growing a black beard and pilfering loads of gold really appeals to me. The big draw back is although the booklet makes

the action sound great, the game is a total disappointment.

Pirates is a basic role-playing adventure with as much excitement as walking the plank in shark-infested waters. The action is so slow and forgettable... where was I? Oh yeah! The idea is good, but the presentation is dreadful.

The animation and graphics aren't too hot either, there's plenty of irritating screen flicker and the music and sound effects are really boring. Nice idea but save your pennies for the sequel!

ROB 46%

Land ahoy! Stop the ship and search for treasure.

On the interactive text screens you get to choose your next move.

Choose the fight option and the action cuts to an arcade-style sequence giving you control of the hero.

ADDAMS

PUGSLEY

Walking hands, spooky stairs and cauldrons full of witch's brew... this can only mean one thing. That ookie kookie family are back again causing havoc on the SNES!

In the first *Addams Family* the hero — poor old Gomez — suffered many a painful arrow up the family catacombs. In the sequel it's little Pugsley's turn to be scared senseless in the gothic corridors of the Addams Family mansion.

Pugsley's mischievous sister, Wednesday, has hidden six strange and wonderful objects around the spooky house to be recovered with a limited amount of lives.

Guide Pugsley through each room searching for energy-restoring magic to keep him alive. Throughout the journey you encounter secret switches, energy-restoring hearts and 1UPs giving an extra life.

Although *The Addams Family 2* is a basic platform-based collect-'em-up, it's full of weird nasties to avoid and destroy. All this action is set against a variety of colour-drenched backdrops and accompanied by lots of eery music.

And for my next trick...! This magician is the spitting image of Paul Daniels with that bald head underneath the magician's hat. He's a tough cookie to crack though.

CARL: 'The game from the tomb'

They're back! The ookie, kookie family that even Dracula wouldn't have next door, return to the SNES for more spooky platform fun!

The graphics are an improvement over the original, *The Addams Family* — the backgrounds are breathtakingly detailed with excellent parallax scrolling and between-level screens. Pugsley's sprite is more detailed than Gomez's was in the first game, leave him too long and you're treated to a side-splitting comic display!

On the down side, the gameplay lacks the crispness of the original. The format is almost identical making for an easy-to-play game but I miss the surprise of finding out the twists the hard way.

The final verdict? It's a superb platformer that gives a winning formula a face lift. If the gameplay was improved — or at least different from the original — I wouldn't hesitate in awarding it a knockout, but as it is it's just another good follow up I'm lowering my mark.

CARL 81%

ADDAMS FAMILY 2

THEY'S SCAVENGER HUNT

NICK: 'A real platform challenge!'

I simply loved the first *Addams Family* game — all that bouncing around with parping sound effects and gorgeous graphics. This sequel is instantly recognisable to all fans of the first game because it appears to be almost identical! But after playing it for a few minutes I realised that this is a very different game.

Ocean have tweaked the graphics to produce some amazing effects — the crystal ball level is excellent! Pugsley makes a great character sprite and the way he eats a sandwich if he's left for too long is hilarious.

This game is much harder than the original — the levels seem a lot tighter with pixel-perfect jumps and slides needed to survive. The animation sequences used on the enemies are out of this world — bouncing on the average enemy sends them exploding into a huge red mess, others blurt out mini-creatures hiding inside!

Platform fans will love every minute of this game. It's got lots more challenge than the likes of *Tiny Toon Adventures*, but it's not so difficult that it becomes annoying.

NICK 88%

These snowball monsters scare the hell out of even the bravest Addams family member. Poor Pugsley just can't stop slipping and sliding!

Make it through the slippery slidy ice levels and you find the spooky entrance to the magician's castle. I wouldn't go inside if I were you!

The only time you should ever go inside a toilet seat is to get out of the levels in the bathroom section. Poo-wee! Better take a peg along!

Aww, how cute! These cat fish meow and spew out fish bones at poor old Pugsley. Is this what you call kitty litter?

WORLD CLASS RUGBY

At last, the great game of rugby makes its debut on the SNES and about time too! For all those who think that rugby is just a muddy version of American football without the pads and helmets, look what you've been missing...

The oval ball has made many appearances on the SNES but it has always been the transatlantic version used in American football, so the arrival of *World Class Rugby* is long overdue.

Slam in the cart and you're greeted by a host of amazing presentation screens — the number of menus and options is phenomenal! The player can customise every aspect of the game — playing surface, wind conditions, length of game, team strip and even the eight individual characteristics of the 15 guys who make up your team! So if you think Will Carling needs a bit more speed just bump up his agility

rating, or make a match more even by handicapping an opponent's star player!

The on-field action offers the choice of one- or two-player games and for couch potatoes there's a full 80-minute demo. All the features of rugby union are included, meaning plenty of scrums, line outs, drop goals, up-and-unders, ruck and mauls.

On top of this, seven difficulty settings, a mass of special plays and non-stop, end-to-end action make this an accurate representation of modern rugby played at the highest level and one of the most inventive sports sims for ages.

Shock horror! Fiji (in white) have scored a runaway try against the normally brilliant All Blacks!

One of Fiji's advantages is their speed to the ball and the ruck. Unfortunately, they can't tackle well so they usually allow plenty of points.

CARL: 'Frantic end-to-end fun'

I was really suspicious when I first heard of this title. Surely Imagineer couldn't capture the fluid open style, speed and complex set plays of modern rugby — boy, was I wrong!

As with most sports sims, *World class Rugby* really shines in two-player mode, but it's still highly playable against a computer-controlled opponent. This is largely due to great presentation allowing you to customise teams and alter skill levels. The addition of a league option as well as an exhibition game is a great touch adding extra lastability in one-player mode. This flexibility puts *World Class Rugby* leaps and bounds ahead of many other sports sims. If this isn't enough, it plays like a dream too — the simple, easy-to-grasp controls are excellent!

It's refreshing to see an original title and an even bigger bonus to find it plays so well. I loved every minute of it — I'm off for another game!

WORLD CLASS RUGBY

The Welsh may be one of the worst teams in the game but they pass the ball very well. Problem is, they haven't learned to catch it yet!

ROB: '100% original sports action'

Most sport sims on the SNES are brilliant — take *Super Formation Soccer* or *Super Tennis* for example — well now there's another great game to add to the list, *World Class Rugby*.

Beside being one of the most original titles for ages — I can't remember a rugby sim on any format — it's enjoyable even if you're not a big rugby fan. Although a basic knowledge of the game is useful, you can still pick things up pretty quickly.

Controlling the players is very similar to *Super Formation Soccer* as the same Mode 7 effects are used to give a 3D perspective. There are loads of teams to choose from, each with differing skill levels so you can always find a good match. The animation is great and the graphics are detailed and very colourful.

The presentation screens look great — the half-time shot of a bloke pouring water onto a unconscious player is brilliant! Sports sims have never been noted for exciting sounds and this is no exception — there's the odd bit of sampled speech and that's about it.

If you're a dedicated sports fan but fancy a change from tennis and football, give *World Class Rugby* a go.

ROB 78%

Left: the Western Somoans (in blue) are a crafty team. Give them an even break and they'll run all over you. They may not be very good from set plays but they're deadly in the open field.

SCRUMMY PLAYS

Set plays are displayed in three left-right scrolling windows. Simply select the special play you want with the highlighter (seen here on the center screen) then watch a step-by-step animated explanation of the move.

The ball moves left to right from man to man (the men are the dots). The players move in the direction of the arrows and the ball is passed at point [A] to the man at point [B].

Highlight the play screen you want, and you get a quick demo. The men are represented by crosses and the ball by the red circle.

Pass the ball to the right and run in that direction so the cover moves away from the man on the long run. Just after they cross [A] passes to [B] leaving the defence stranded.

Classic play! The England number nine (in white) holds onto the ball until the cover is sucked in, then passes wide.

The only problem with the set plays is if you don't get it just right the whole thing falls apart and you look a right pratt!

England (in white) are on the break. Dowie Morris feeds the Welsh forwards a dummy and runs for the line.

TAKING CONTROL

One of this cart's best touches is the variety of control methods for each aspect of the game.

In a scrum or ruck use the joystick to move the ball to your end and win possession.

Move the cross hair on the ball to alter the height and distance of the kick.

Move the cross up and down the lineout to set the length of throw.

GET KITTED OUT!

Rugby fever is sweeping the nation so lace up your boots, slam in your gum shield and prepare to win the latest line in snazzy sports gear. Take a look at what you can win...

More and more people are getting switched on to rugby thanks to England's recent success in the Five Nations Championship, the very popular rugby World Cup held in 1991 and now a great new console rugby game —

World Class Rugby.

Anco are the first company to produce a rugby game for the SNES (check out the review on page 48) and it's absolutely fabulous.

Play international teams in friendly competition, or take on the cream of

rugby in the World Cup — there's action galore for one and two players! Customise players' abilities to form your dream team, then take the field for rucks, mauls, scrums, lineouts and tackling around the neck — all the rough 'n' tumble of the game is captured for you to enjoy in the comfort of your home.

JOE & MAC CAVEMAN NINJA

Poor Joe is in trouble. While he was asleep, a band of wandering caveman entered the village and kidnapped all the women. That can only mean one thing — it's time for the prehistoric axe-wielding hero to go out clubbing again!

Hot from the SNES and the NES comes the latest instalment of this popular series of prehistoric platform games, *Joe & Mac: Caveman Ninja*. The aim of the game is to rescue a group of village women being held hostage by a ruthless gang of stone-age kidnappers.

In this one-player handheld version Joe's all by himself as Mac has gone hunting. The adventure is spread over nine levels with waterfalls, giant sleeping dinosaurs, ancient burial grounds and the inside of a Tyrannosaurus Rex to explore.

Power-ups are hidden throughout the levels with wheels, boomerangs and fireballs all coming in useful against the multitude of swarming enemies. Energy is tight but is boosted by picking up the fruit and chicken legs that enemies drop when bashed.

In true platform tradition each level has a boss to deal with — huge dinosaurs and killer Venus fly traps are just a couple of the nasty surprises awaiting. Joe's definitely got his work cut out!

Strolling through a dinosaur-filled valley can be a hair-raising experience — carry a club at all times!

ROB: 'Great gameplay!'

Joe & Mac: *Caveman Ninja* is an excellent conversion of a classic game. The format is the same as the brilliant SNES and NES versions, although the gameplay suffers from the lack of a simultaneous two-player option.

The detailed animation of the dinosaurs is very impressive and the controls although basic, are smooth and responsive. The graphics show off the Game Boy to the full and the sparkling melodies create a fun atmosphere. If you're looking for a fun platformer that'll give hours of enjoyment, give this go — it's a prehistoric classic!

ROB 80%

NOAH'S

It's raining, it's pouring and Noah's Ark is... one of the best platformers since the flood. Build an Ark, travel the world, save the animals — it's non-stop action in this Biblical basher!

In the Earth's early days, long before consoles were invented, there lived a bloke called Noah. As Noah was a trustworthy man, God gave him a very important mission — to save two animals of each species and take them aboard a huge boat called The Ark.

This colourful platform game features Noah travelling around the world's continents saving animals from the coming flood. Noah's journey begins in Europe, where he searches three tough sections before a show-down with one of the many end-of-level caged creatures that include fish, snakes and other ghastly zoo rejects.

Along the way, Noah can pick up various power-ups and energy icons including armour, giving temporary invincibility. Other special items — including apples, bananas and oranges — restore Noah's energy which is represented by a power bar at the top the screen.

Gathering the animals isn't easy, so the bearded hero is armed with an effective stun gun. One blast is enough to stop most creatures in their tracks, leaving Noah free to take the sleeping beauties back to The Ark.

After all the animals have been

rescued, take them back to The Ark — two by two of course — and wait for the flood. Don't hold your breath though — it could take a lot longer than you think!

Soon all those green lumpy bits will be a lovely shade of blue. Noah has to save all the animals before high tide!

Poor old Noah — over 400 years old and he doesn't look a day over 390! Here in Europe all he has to do is find the exit. Look up old fella, the door is right over your head! Maybe he needs a hearing aid?!

Searching for the camel is very tricky — watch out for club-wielding maniacs who stop at nothing to protect their animals!

Watch out for the giant fish at the end of the Europe stage. Here, Noah uses his special power to turn into two little fishes.

ARK

This is The Ark where Noah begins his journey. His mission is to travel the world rescuing animals and then take them — two by two — back to The Ark before the great flood comes.

KNOW YOUR NOAHS!

During the game, Noah can pick up hidden potions and icons turning him into an incredible Super-Noah! Just take a look at some of the amazing powers he can use...

Wings of a dove: sends our hero high into the air when [A] is pressed. Useful for getting through tough water levels.

Turned to stone: the ultimate weapon against those crafty reptiles. Bounce on them with stone shoes!

Red raw: when Noah gets a red tint he's hot stuff — those nasty animals just can't cope with the fire-power!

Two little fishes: to take on the giant fish at the end of the Europe stage, Noah becomes a fish too!

Met his maker: step on the wrong thing or get poked by a centurion and Noah takes a trip up to see St. Peter!

NICK: 'It's a corker!'

I'm sure all NES owners will admit that many recent platform games feature almost identical gameplay with different graphics — if you've got one cute platform game you've usually got the lot! Well, *Noah's Ark* is here to make you think again.

Konami have done all 8-bit fiends proud with a superb and original game packed with brilliant animation, attractive graphics and superb playability. The horizontally-scrolling levels are very tough — the water level is a real killer — so you need lightning reactions to complete the mission. Using the continents as levels is an excellent idea and the giant bosses are a real test.

Noah's Ark is top notch stuff. Forget all those boring platform games and get a load of this — my Sunday school teacher would be proud!

NICK 81%

Yikes! It's the Level One guardian. Poor old Noah's got his work cut out defeating him. Take too long and the water rises making life extra hard.

CARL: '40 days and nights of fun'

What an original platformer! *Noah's Ark* combines simple but effective gameplay with a well-adapted platform formula to produce a great title that will keep 8-bit game fiends occupied for hours.

Although there are some annoying glitches in the graphics — for some unknown reason the sprites flash to white silhouettes when hit or touched — the rest of the game is very impressive.

The gameplay has many good points — I really like the way you're constantly racing against time, the rising water and the automatically-scrolling screen — stay still too long and you're pushed off!

The search for pairs of animals takes you from the green lands of Europe to the snow and ice of Antarctica — it's a tough challenge that will certainly take plenty of time to complete.

Although not really my type of game, if you enjoyed the *Super Mario Bros* series, *Noah's Ark* is certainly a cart to think about buying. Just one parting thought — did Noah really take two woodworms with him and if so how did he know he'd got a male and a female? **CARL 73%**

Cheer up Noah — you've managed to save the first of your animals, a dopey rabbit. Now it's back to The Ark. Row, row, row your boat gently down the stream...

New York is not the nicest place to get lost in — especially when you're barely out of nappies and there's a hotel detective, two ex-cons and a gang of ruthless muggers out for your blood. Luckily, young Kevin McCallister has plenty of tricks up his sleeve...

The Level One boss is the knife-throwing Master Chef. Forget your weapons, use the knee slide (top left) to remove items of the chef's clothing (top right). After a couple of good slides the evil soup stirrer loses his shorts (right) and tumbles to the ground in a heap. All that remains is his hat and a load of cookies (below). Scoff the food and get out of there!

Surprise, surprise! Kevin McCallister has been separated from his family once again. This time the young lad is lost in New York with two desperate villains and the entire staff of the Plaza Hotel on his tail.

Home Alone 2 is a platform romp through four huge and hazardous levels. Level One is based in the plush surroundings of the Plaza Hotel. Unfortunately, the hotel staff don't take kindly to a little kid running around, so Kev is constantly chased throughout the various floors by peeved porters, cheesed-off chamber maids and a hotel detective that takes great delight in ringing young lads' necks!

Escape the end-of-level boss — The Mad Chef — and make a break through Central Park — watch out for muggers! Next, it's off to the town house — to set traps for Harry and Marv — before finally arriving at the Rockefeller Centre Christmas tree and befriending the pigeon lady!

It's a tough challenge but along the way there are loads of power-ups to collect including: a variety of bazooka-style weapons; stun guns; special credit cards giving temporary invincibility; a duck allowing you to knock over enemies with mid-air spins and energy-restoring pizza — yum, yum!

ROB: 'Fist-flying action!'

The first reactions around the office to this sequel to the tragic *Home Alone* game were very cold. But after I'd played it for about half an hour it became clear that this game is worlds away from its shoddy predecessor.

The gameplay is vastly improved with four huge stages to wade through, nasty end-of-level bad guys to beat and plenty of tricky traps to spring.

Although some of the graphics — particularly the character sprites — are sketchy, the animation is very good and there is a varied selection of sounds and FX. Gameplay is pretty tough to start, but give *Home Alone 2* a bit of time and you'll find it's a cool platformer that'll take some time to crack.

ROB 71%

There's trouble at the Christmas tree — poor old Kevin McCallister is at the mercy of the bad boys. The only person to help him now is the Pigeon Lady. Can she do it in time?

Kevin's an agile little lad — he leaps over sofas, trips up hotel workers, sets traps for Harry and Marv and climbs down slippery ropes. Make sure you avoid the frightening bats that fly out of the dark — they takes lots of energy!

Kevin's vast arsenal includes an extremely handy bazooka-type weapon called a Flying Fist. This deadly gadget fires boxing gloves across the length of the screen.

ROOM SERVICE!

Pizza slice: collect six of these for an extra life. Look for them hidden in the lights!

Pigeon: gives Kevin an invincible mid-air spin-jump for defeating enemies.

Whole pie: grab this mouth watering delight for a 1-up. Try looking in the hotel rooms!

Credit card: your flexible friend makes Kevin temporarily invincible

Cookies: collect five of these scrummy snacks to recover one lost power unit.

After shave: gives extra speed, a longer jump and invulnerability for a short time.

NICK: 'I wouldn't stay home alone with this game!'

This is an odd game! All the features are far superior to the original — with graphics that actually look like they were intended for a SNES and a good movie-style soundtrack — but the playability leaves much to be desired.

Level One is ridiculously difficult and frustrating as there's no mid-way point, so when you die you have to repeat sections. Weapons are supposed to help out with the end-of-level baddies but you always seem to run out before getting to them!

I haven't seen the film, because the thought of spending two hours looking at Macaulay Culkin's ugly mug put me off, but I'm told this SNES conversion follows the plot closely. The graphics are above average — but only just! The game's characters must have all had nasty accidents, as the animation on everyone but the hero, Kevin, is atrocious — they look more like robots than humans!

The plain truth is *Home Alone 2* is a below-average platform collect-'em-up that kept everyone at N-FORCE playing for one reason — it was the only game we had at the time!

GRAPHICS

SOUND

The film soundtrack slickly converted

PLAYABILITY

Using the force isn't easy — but it is fun!

LASTABILITY

Lots of levels to explore — fans will love it!

FORCE FACTOR

A welcome addition to the Star Wars trilogy — great!

THE EMPIRE STRIKES BACK

Luke, Darth and Obi are back on the Game Boy, and this time it's a duel to the death. So draw your lightsaber, clear your mind and prepare to use the N-FORCE...

You've blasted your way across the Tatooine Desert, defeated Darth Vader and blown the Death Star into cosmic oblivion — surely it must be time for a well-earned holiday?

No chance! The rebel party has been gate crashed by Darth's imperial troops and it's up to Luke Skywalker to tackle the evil menace of the Dark Side once more.

The game's plot follows the film closely with you playing Luke Skywalker in his battle against Darth Vader and his minions. The adventure takes you through a variety of game styles including platform, blast-'em-up and training levels — there's enough to keep you going for weeks!

Search ice caverns, destroy Imperial Walkers, find the elusive Jedi Master, Yoda, and master the power of 'The Force.' And when you think you've done it all, prepare for a showdown with Lord Vader. Only if you overcome the lure of the Dark Side and defeat Darth can you rescue Princess Leia and return home a hero.

With such a hard task ahead the key is to find as many hidden items as possible — some, such as the lightsaber, are necessary for later parts of the game. You've got the help of a Tauntaun (a large white kangaroo) in the first levels to help you get around but even so, this is still one tough challenge. So get that lightsaber out and use 'The Force.'

ROB: 'A great sequel'

When I first played *Star Wars* on the Game Boy, I was very impressed with its detail and playability — *The Empire Strikes Back* is even better. Loads more detailed sprites, booming sounds and addictive gameplay — this has got the lot.

The action follows the film with lots of familiar sequences — like the AT-AT battle and the Darth and Luke confrontation — plus a few original touches thrown in for good measure. Backgrounds are great and the familiar theme music sounds spot on. Despite some frustrating sprite flicker in the later levels, *The Empire Strikes Back* is a very good movie conversion. Anybody who's a fan of the film trilogy will really get off on this miniature epic.

ROB 84%

RE BACK

The different levels and ledges are linked by large ladders — it's a good job Luke isn't afraid of heights! The lightsaber (below) is one cool weapon.

MILO: 'Excellent graphics!'

At first look, *The Empire Strikes Back* seems like a regular platform adventure. But get beyond the first few levels and there's a whole world to explore with heaps of challenge and levels galore—this is one game you're not going to finish in a hurry!

Graphics are of the same high standard as *Star Wars* on the Game Boy with stacks of detailed backgrounds and impressive intro screens. Music is the unmistakable theme tune from the movie — proving that not all Game Boy sounds are rubbish!

The highlight of the game is its size and complexity — there's just so much to do. Whether you're a fan of the movies or not, this is one game not to miss.

MILO 88%

Just when you think you're safe an enemy comes flying out of the air. The best bet here is to run back up the ledge and wait for him to make a move. As soon as he comes towards you, leap and let him feel the full force of the light saber.

One of the most exciting parts of the game is the trip to see Yoda. Here Luke learns the way of the Jedi Knights and masters the powers of 'The Force.'

Extra lives are tucked away on out of the way ledges. Always explore every part of a level, there are loads of bonuses just waiting to be discovered!

USING THE FORCE

Luke and the gang have been big stars on Nintendo consoles during the last 12 months. *Star Wars* on the NES was the first game in the series to arrive mid last year and set the standard with plenty of action and heaps of levels to explore.

Then came the sequel — the *The Empire Strikes Back* on the NES — closely followed by the challenging Game Boy version of *Star Wars*. But the real treat for *Star Wars* fans was the SNES version released early this year.

Bone-crunching Mode 7 graphics and cinema sound make this cart hot property — scenes like the Land Speeder level and the final Death Star shootout are a visual feast!

The Empire Strikes Back on the Game Boy is the fifth Nintendo game to follow the exploits of Luke and co. and understandably it has a lot to live up to. It has been developed by the French company Ubi Soft — the team behind *Star Wars* on the Game Boy — and has a similar feel, although the difficulty setting has been tweaked to make it more of a challenge.

MAD ON MOVIES?

Star Wars may seem a recent phenomena, but it was in fact 16 years ago that Luke Skywalker, Han Solo and Princess Leia made their movie debut.

Star Wars hit the screens in 1977 and became an instant blockbuster, followed in 1981 by *The Empire Strikes Back* and in 1983 by *Return of the Jedi*.

Since then there has been nothing — despite whispers of a fourth movie — but the popularity of *Star Wars* has spawned a huge cult following with books and merchandise still selling strongly.

Who knows? With the interest generated by the games, Luke and the Princess together again on the big screen may not seem such a fantasy.

CARL The traditional fruity fun is spoiled by poor graphics and playability.

CHRIS Tough but unrewarding! Old enough to be considered a classic but certainly not good enough!

CHIKI The frustrating gameplay put me off. Definitely not as good as I remember it in the arcades!

GRAPHICS
Colourful but not particularly detailed

SOUND
Arcade-style tunes and 'boing!' effects

PLAYABILITY
Tricky gameplay but practice makes perfect

LASTABILITY
There's lots of it — you'll be playing for yonks!

FORCE FACTOR
Hardly a classic! A just-above-average platformer.

ADVENTURE ISLAND CLASSIC

These are desperate times — especially if you're a beautiful princess! There's always some dastardly deviant around the corner waiting to kidnap you. N-FORCE come to the rescue but are they too late...?

Poor Princess Leilani! No-one told her there was a maniac witch doctor on the loose. So there she was, shopping for a size 12 leopard-skin bathing costume, when what should happen? Some dude with a bone through his nose popped a bag over her head and whisked her away to Adventure Island in the South Pacific.

What's even worse is Master Higgins — her true love and protector — was nowhere in sight. So now he must don his hula skirt and travel by chartered skate board to save her from a fate worse than death (what is a fate worse than death? Shopping in Milton Keynes? Taking two bottles into the shower? I'd really like to know).

Adventure Island Classic is standard platform action with you, as Master Higgins, exploring the forests, mountains and caves making up the island. As if things weren't bad enough, your quest is against the clock —

the longer you take the more energy you lose.

The only way to regain lost strength is to collect the fruit and milk bottles scattered about the eight levels. There are also a number of power-ups hidden in large eggs — but beware, not all of them are beneficial! There are masses of secret rooms, bonus

stages and hidden paths — find one of these for loads of extra points.

The only other help is a continue option which needs to be activated by finding the bee icon. Sounds quite generous but you need as much help as you can get, if you're to overcome the tough challenge of Adventure Island.

Yee-har! Walking along collecting fruit is babies' stuff. Grab a skateboard, it's much faster — but don't forget to put a helmet on first, you could have a nasty fall!

NICK: 'Very fruity!'

Flippin' heck! I remember playing this golden oldie years ago in a run down arcade on the sea front — ahh! Family holidays. Adventure Island was loads of fun then and this latest NES conversion has still got that addictive charm.

The level layouts are exactly the same as the arcade machine, right down to the position of the fruit bonuses and enemies — good job I've got a photographic memory! All the original power-ups are here; the axe, skateboard and the flying fairy giving invulnerability, are all hidden inside giant eggs.

Gameplay is really tricky — I couldn't even manage to get past the first area! Visuals are nothing special but are faithful to the arcade original if that's any consolation. The sound is still great with a racing tune to keep players on their toes and the usual 'boing!' jumping effect.

Adventure Island Classic is exactly as it says in the title — a classic. If you haven't got it on your NES, give it a whirl — many may find it a little dated though.

RE ISLAND CLASSIC

Watch out for the goal sign at the end of each level. Enter the spooky cave and it's off to the next exciting stage. It's touches like these that make the game faithful to the original arcade version.

These nasty cave dwellers come out to drive you batty. Give them a bash and they leave you alone!

Watch out for that nasty water! It's full of slimy devils out to eat you!

Invulnerability is always useful — with a little help from a pretty fairy!

ROB: 'Good arcade conversion'

As far as coin-op conversions go, *Adventure Island Classic* is pretty average. Although it's got all the features of the original arcade version, the gameplay is very irritating.

The lack of continues is very frustrating — three lives is pretty stingy, especially when the gameplay is so tough. On the positive side, the graphics are extremely colourful — so colourful that it's advisable to wear sun-glasses unless you want to burn out your retinas!

The thumping soundtrack is impressive to start but quickly gets annoying. All in all, *Adventure Island Classic* is a game that older brothers or dad might enjoy but '90s game fiends will find disappointing.

Things are looking great! When you've got the skateboard and the Honey Girl, you're invincible and super fast. Hurry, she only stays for a short time!

CLASSIC COLLECTABLES!

Egg: crack them open — with your axe or by running into them — to reveal power-up's.

Honey girl: an excellent friend to have. While she's around you are invincible.

Stone axe: this handy weapon gives extra firepower essential for survival!

Fruit: come in many mouth-watering varieties. Each one collected boosts energy.

Skate board: use this rad device to speed through the levels. One hit and you lose it!

Stone: they look harmless enough but hit one and you lose vital energy!

I've heard of free range eggs but this is ridiculous! There are many surprises hidden inside these shells — crack them open for a power-up.

If you're having problems cracking this gory blast-'em-up, try this sneaky cheat. To avoid fighting any enemies enter the Circuit Select code — press [RIGHT], [RIGHT], [UP], [DOWN], [R] and [L] on the title screen.

When you've chosen which level you want to begin on, start the game. Before you enter the door in the next

room, hold down [SELECT]. When you go into the next room all the bad guys die and after a few seconds a voice says 'Lets go.' As if by magic, all the exits open. Repeat this to complete the game.

Hook

This cheat enables you to build up loads of extra lives. When you get to level 5, at the start of the level fall down the first chasm on the right. You will then notice Tinkerbell at the bottom of the pit, walk across to the right and you'll see a 3-up and a leaf. You have to go underneath the rocks to reach them. Then when you've collected this, die and repeat same the same procedure until build up enough lives.

Adventure Island 3

Here's a handy stage select for this great platform adventure. On the title screen press [DOWN], [UP], [LEFT], [RIGHT], [B], [A], [B], [A] and the stage-select screen appears — try the last level, it's really tough!

Krusty's Super Fun House

Here are a couple of handy cheats for all you Krusty fiends out there. Enter the password JOSHUA — put a space before and after — to exit a section without completing it — simply go back to the door and push [UP]. If you repeat this on every section, you'll be able to see the game's finale.

The next cheat helps you round up the rats in a room quickly. In any room where Krusty has at least two moveable blocks, place the first block next to a wall. Now wait until the rats cross the block and are between the wall and the block. Stand on the block and release the second block thus trapping the pesky rodents. It's best to make sure that the area between the blocks and the wall is the size of another block because then the rats compress into a single rat.

CHUCK

ROCK

Part One

Get out your Brontosaurus burgers! It's time to go clubbing! **TIPS FORCE** brings you **PART ONE** of a stone-age solution to **CHUCK ROCK** on the SNES. Stand by for the first three stages of this prehistoric platformer...

Stage One

Heart: grab this pounding power-up for one extra energy point.

Meat: when hunger strikes add one energy point by chomping this.

Pig's head: Yum, yum! My favourite. This little piggy gives 10,000 points!

Small rock: use this as an umbrella or to give a bit more height for a jump.

Sausage: keep your eyes out for bangers. You get 100 points for each.

Bean: Coffee bean, baked bean, Mr Bean! There's 100 points for each one.

Monkeys: throw coconuts at Chuck from the tree tops. Use a small rock at an umbrella.

Giant Dinosaur: use him to cross the swamp by standing on his back.

Swamp: use a large rock to cross this stinking mess.

Flies: buzz around Chuck's head and can be killed with one hit.

Walker: trundle along the ground with a huge hammer to bash things!

Marcher: stride about platforms with nowhere to go.

Tip toes: sneak about and pop up when you're least expecting it.

Baby bird: covered with a shell and deadly to the touch!

Pterodactyl: fly around and swoop onto Chuck's head.

Handy pterodactyl: when hit they fly up, grab Chuck and move him to another platform.

Green dino: trundle about and split into two, then four smaller dinosaurs!

Sea saw crocodile: throw a rock onto his nose and he'll catapult Chuck skyward!

Leaper: these just jump around the level making trouble.

Tiny Jaws: look harmless but have giant teeth which are bared if Chuck goes near.

Blue spike: just pop him off before he gets nasty.

Shy dino: marches up and down with his head in the ground!

● Boss

Rasping dinosaur: Pick up the small rock and throw it at this dino from the ledge. Then while he runs away Chuck can quickly jump down, pick up the rock and repeat the sequence until he's popped off!

● Boss

Sabre toothed tiger: sneak up behind this harmless looking little pussy cat and repeatedly hit him. If you have timed things right you should be able to get constant hits in before he can retaliate.

Stage Two

Lemon: this tangy treat is worth 1500 points and it's rich in vitamin C.

Mushroom: this funky fungi is worth a whopping 1000 points.

Tomato: fried or green, grab this tasty tommy for 1000 points.

Scary sludge: suddenly pops up from nowhere and can't be killed. You can't tell where they are by watching the brown earth.

Purple hedgehog: watch out for those spikes! Pop him off.

Jogger: dashes about the level thinking he's in a marathon!

Spider: climbs up and down his web getting in Chuck's way.

Curled worm: hit him to form a diving board for Chuck to reach another platform.

Spotted mushrooms: bounce around the level until they are killed. Yellow splodge: boring! Kill this thing quickly.

Balloon flyer: deflate this dino with one hit.

Stage Three

Starfish: 400-1000 points depending on the size of the star.

Goldfish: too cute to eat really but what the heck — they're worth 600 points!

Turtle: crawl around aimlessly until you put them out of their misery.

Whale: use him for a lift across the water in a similar way to the dinosaur.

Crab: have very nippy pincers. Hit them before they can get them out!

Guppy fish: just swims left and right, one hit and he's gone!

Squid: float on top of the water but deadly to the touch!

● End of stage Boss

Watery squirter: this slippery character is very tricky — he needs a kick in the stomach at the right time. Wait until he has thrown out his crabs and squirted water, then go for it. This requires lightning reflexes — one wrong move and Chuck will be killed instantly!

Frogs: stand on their heads and they will leap, catapulting Chuck to the higher platforms.

Another pulsating pre-historic part next month...

MCDONALDLAND

The golden arches are crumbling! The Hamburglar is on the loose and he's stolen Ronald's magic bag. The **TIPS FORCE** team make your day with some tasty nuggets of info on the appetising adventure **MCDONALDLAND**. Look at the pictures, read the tips — it's just like a menu. Have a nice day!

Draggie: he may look like an harmless little snail but if you touch them they'll drain your energy.

Albert: don't be deceived by his cute appearance. Watch out when you try to leap over him as he leaps high up when you jump.

Hanging Harry: Harry isn't the nicest of creatures — he lowers himself down from a tree to get

To get puzzle cards hidden beneath a platform, run towards the wheels at the end of a ledge. Sprint fast enough and you turn upside down — you can now pick up the cards and coins. Repeat the process to get up the right way again.

Goforit: this little pest follows you, so watchout for him. The best way to get past him is to run fast and leap over him.

Gnash: lurking deep in the waters of McDonaldland is this vicious pirana fish. If you fall in the water Gnash kills you straight away. Be careful he hasn't eaten anything for weeks!

Putt: although Putt flies above your head, you still need to be careful when you leap into the the air

Puzzle Cards: these aren't something you get free with a Happy Meal, they are your passport to another world. Before you can exit a level, you need to collect the right number of puzzle cards — better keep your eyes open though, they're hidden in the weirdest of places!

Secret Worlds: there are many secret worlds in McDonaldland. Enter these worlds through zips. In the secret worlds there loads of Golden Arches to collect and even the odd extra life.

Leaves: floating leaves help you get onto certain platforms. There also falling leaves which are trickier to leap onto.

Ronald's Club
Lv14: Mountain
Cards Needed
Lives: 01

The stages of McDonaldland are sub-divided into levels. Search them for puzzle cards and hand them to Ronald — he'll transport you to a new stage. The further you get the more cards you need!

AND

To find hidden blocks, try picking up a normal block and taking it to a spring platform. Using the block as a weight (see above) bounce onto the platform for an extra-high jump!

That's all for this month. Tune in next issue for more of the best tips and cheats around.

MAIL FORCE

It's letter time again and Spring fever has got you all putting pen to paper and voicing your opinions. The N-FORCE team delve into their massive mailbag once more — and what a manic May it is...

Safe as houses!

I got a Game Boy for Christmas and now I would like an Action Replay cartridge, but I have heard that it damages the Game Boy. Because your mag is so cool I thought you would be able to tell me if this is true.

P.S. Can you please send me one of your really cool *Street Fighter II* posters?

■ David Officer, Catterline, Nr Stonehaven

■ Who started these stupid rumours in the first place? There's no way that an Action Replay cartridge will damage your Game Boy. All it does is alter the code of a

game to create infinite lives, time or any other effect. It's harmless and loads of fun! I'm glad you liked the *Street Fighter II* poster, there aren't many left but we'll have a look around the office and find you one. If you want any other back issue, all the details are on page 68.

■ NICK

Double Dutch

Here's a letter from two Dutch game friends who think they are pretty good, but enough small talk. We got hold of your February issue and we think it's absolutely brilliant. We love the way you handle Sega and the reviews and tips are very useful.

There's plenty going on in this piece from Angus Thorne. Love the *Street Fighter II* character and the Dizzy Devil is coooooooooooooo!

Letter of the month!

Praise be!

I bought Issue Eight of your great magazine a couple of days ago and on reading it was pleasantly surprised. I like the way each reviewer gives a game their own score.

This helps because you can, when reading all the way through, build up a picture of what sort of games each reviewer likes best, and you can then choose the reviewer(s) that have the most in common with your taste and select them as the one you trust. I don't know whether it's meant to work like that but it sure is useful when choosing a game.

Secondly, perhaps you could include a games index as these prove very popular and useful in other mags (I'd dare not mention which mags) and how about some posters?

Oh, and by the way, your right — Sega are crap! Keep up the good work.

■ Chris Blake, Trowbridge, Wilts

■ Thanks Chris! We always listen to our readers so I hope you like our Full Force section reviewing every game ever to have appeared in N-FORCE. It's taken ages to compile but I'm sure you'll agree that it's worth it. If you're thinking of buying a game, just look it up in the index and see what we think — no more wasted cash! If you've got any more suggestions we'd love to hear them. Oh, and have a T-shirt for being Letter of the Month!

■ CHRIS

Could you please answer a couple of questions.

1. Could we order a Pro Action Replay (SNES) if yes, how? Do they ship to Holland?

2. Can we order games from Krazy Konsoles, Zonetec or Game Pro? (There are only about 14 SNES games in Holland)

3. Do you know if the SNES game *Best of the Best* is any good?

4. Can you tell us what the terms 12 Meg and 16 Meg mean as used in the Krazy Konsoles advert?

■ Jan and Maarten Kok, Netherlands

■ I'm sure you could order an Action Replay straight from Dattel Electronics if you can't get hold of one in The Netherlands. Their UK phone number is 0782 744707. The same goes for all the mail order companies you mentioned. Just give them a call or write with your requests and I'm sure they will be able to help you out.

Best of the Best isn't a brilliant game but we all had a laugh playing it around the office. It got 76% back in Issue Nine.

Oh and the 'Meg' rating on the

Please could you answer these questions.

1. What's the best game on the NES not including *Super Mario Bros 1, 2 or 3*?
2. Which *WWF Wrestling* game is the best on the NES?
3. Where can I get a cheap video game?

■ Jason Parsons, Gloucester

■ There are some brilliant games around for the NES. Have a look at

The Fantastic Adventures of Dizzy — a great arcade adventure game starring a jolly bouncing egg. Or there's *Noah's Ark* reviewed this issue — it's a great laugh!

There have been a couple of *WWF* games now. The best in my opinion is *Steel Cage*. If you're looking for cheap video games and are fed up of paying out £40+ for a cartridge, check out the new Code Masters Plug-Thru range — *Dizzy*, *Micro Machines* and the *Quattro* four game cartridges are coming out all priced at £29.99 on the NES!

could you tell me why this has happened.

■ Nick Colquitt and Eddie Morecroft, Lowdham, Notts

■ I'm glad you mentioned this Nick as there's a lot of confusion about codes. I'm always getting new Action Replay and Game Genie codes sent in but many readers don't realise that there are different types of codes. The trouble is, different versions of games are released in Japan, the USA and Europe and each have different codes.

People often send in codes but don't say what machine or cartridge they are for. This is probably why the *Tiny Toon Adventures* codes didn't work for you. Find out what cart and machine you are using and drop me a line — I'm sure I can sort out the problem.

Question time!

I'm writing to tell you how great your mag is and to ask a couple of questions:

1. In Issue Four's Yank Tank you advertised a keyboard for the Game Boy called The Work Boy. I would oh so dearly like to have one. Do you know how much is it and when it is coming to New Zealand?

2. Also in Issue Four you only reviewed three NES games and yet you

reviewed 13 SNES games. I don't want to sound rude but in the future could you try to have more NES games reviewed. Please!

■ G Kruitbosch, New Zealand

■ Well, gee! The Work Boy was a piece from our American correspondent Marshall. He picked up the photograph in the States. Your best bet is to try some of the Game Boy importing companies that advertise in N-FORCE — Krazy Konsoles (0422 342901) for example. They will be able to give you more information on prices and availability.

As for reviewing more SNES than NES games, it all depends on what carts are available that month. More SNES games have been released lately but that doesn't mean it won't change around in the future!

■ CHRIS

Around the world

Dear N-FORCE, I think your magazine is brilliant but can you answer a few questions:

1. About *Super Mario World* on the SNES, where can I find the last switch palace?

2. Also, how do I get to the last two fortresses (the one on Chocolate Island and the one on Valley of Bowser)?

3. And, where are the other exits for Star World 1, 3, and 4?

OFF THE WALL!

It's just like being in a real art gallery at N-FORCE this month. We've had so many brilliant drawings it's impossible to print them all. Here's a selection of the top of the crop!

Hal! Hal! In your dreams Sonic! Merion Woolf has recreated the ultimate nightmare of that pesky blue hedgehog.

4. Finally on *F-Zero* can you tell me where some jump plates are? (I've only found one at Red Canyon 2). Anyway keep on pouring N-Force into Australia.

■ David Lloyd, NSW, Australia

■ What you want is Issue Two of N-FORCE. That had my tips on every secret exit in the game, ideal for helping out any struggling Mario fiend. Pop over to the back issues department (page 68) and buy yourself a copy now.

As for *F-Zero*. Both of the Port Town tracks have jumps in them. Press the turbo button and down on the joypad before hitting them for maximum lift!

■ NICK

The missing Link!

Me and my friend are really stuck on the ice palace of Dark World in *The Legend of Zelda* on the SNES. We've got fairly near the end of the palace and have come to the room where a door needs to be opened by a switch that doesn't keep the door open unless it is constantly weighed down.

We know that a block from the left hand side of the hole is the floor on 5F above be pushed off the edge so that it lands in 5F below, allowing the switch to be kept pressed down. However, whatever we seem to do (backtracking, changing crystal switches, etc). We cannot get the

correct block to be pushed off the edge. There's always a crystal switch blocks obstructing our way.

Please, please help us, as this has been puzzling me and my friend for ages. The tips booklet supplied with *Legend of Zelda* wasn't much help, so we're counting on you dudes at the greatest magazine ever to help.

■ Peter and Chris the Zelda freaks, Boxted, Surrey

■ What you need to do is hit the crystal switch on B6 to lower the blue fences. Climb up to B4 and then back down to B5, making sure you drop into the left side of the room. Now push the lower-left stone into the hole and jump in behind it. When you land you can push the block onto the button — it's as simple as that!
